## WORK EXPERIENCE

Software Engineer

Jun 2021 - Present

### MedX International

At MedX, I improve healthcare access and efficiency through data-driven visualization and digitized processes. My work empowers providers to deliver high-quality care by streamlining workflows and making critical data more accessible. I'm passionate about using tech to solve complex problems and improve lives.

Software Engineer

Jan 2022 - Sept 2022

### Gitstart - Remote

At Gitstart, I scaled engineering velocity through the company's innovative Code as a Service platform. I fostered teamwork and knowledge sharing through technical problem solving and code reviews, improving the quality and efficiency of our engineering process. It was inspiring to work with such a talented and mission-driven team, and I'm proud to have contributed to a company making a real impact in software development.

Frontend Developer

Feb 2021 - Jan 2022

### Loft Uganda

At Loft, I collaborated with a talented team of designers and engineers to create exceptional experiences that inspired and amazed. I pushed the boundaries of what was possible, always keeping the end user in mind. It was an incredible experience that challenged me to grow both professionally and personally.
